LOADMASTER X5®

Improve your cargo handling with the unparalleled efficiency that comes with cutting-edge technology. The LOADMASTER X5 provides a complete suite of tools for optimal stability and strength of your vessel, as well as real-time monitoring of loading operations in a user-friendly interface – all tailored and adapted to your specific ship requirements.

Advanced Loading Computer Software

LOADMASTER X5 is a digital solution for managing ship stability and strength before, during, and throughout cargo operations, ensuring safe, efficient, and fully compliant voyages.

Key Features

Loadmaster X5 offers unmatched versatility, compatible with nearly all ship types and sizes, and supports standard online protocols for seamless integration with your existing systems. Its universal design makes it ideal for both new builds and retrofits. Developed by a team of naval architects, programmers, and experienced navigators, it delivers precision and reliability.

Loadmaster X5 is more than a loading computer, it's a complete solution for safe, efficient, and compliant ship operations. With unmatched versatility, 40 years of expertise, and a modular, expandable design, Loadmaster X5 remains the preferred choice for shipping operations worldwide.

LOADMASTER – Excellence in Loading Computer Technology.
