POLAR JET®

The POLAR JET range has set the standard for tank cleaning for decades. Unique designs combined with superior settings deliver high-quality results every time – and reduce the total time required to clean a tank. With proven reliability and continuously improved technology, POLAR JET consistently supports more efficient operations, both environmentally and economically.

Efficiency for any operation

Offering a wide range of models with portable and fixed units, POLAR JET enables efficient tank cleaning across a variety of applications, from small barges and chemical carriers to large VLCCs and offshore installations. Built for long service life and minimal maintenance, POLAR JET delivers reliable performance in demanding conditions.

Designed for sustainability

The revolutionary ECO feature adapts the cleaning pattern to the shape of each tank. This ensures a more even distribution of cleaning media across every surface, delivering improved results while reducing washing medium consumption, slop water and total run time by up to 25%.

POLAR JET – Tank cleaning solutions designed with the user in mind.
